OREGON**

ABOUT HENNESSEY ROSE PLANTS AND ROSE SHOWS

It is best to realize every rose variety in existence is at some time marvelous, otherwise the originator would never have continued to propagate it. This should be a lesson to you to not say, when you see a rose, that you want it. It may be impossible to live with, having a disposition that you as an amateur simply cannot seem to please. It may catch all the mildew that comes around or simply cannot let a blackspot spore go by, also have a lot of other bad habits that in humans would cause a divorce.

I do my best to not propagate all of the new names that are so little different from the older varieties that the nurseryman has to look at the name stake to tell the difference.

Twenty-five years ago it was high pressure selling by word of mouth and personality. Today it is being done with color. The photographers are working overtime getting pictures under the most favorable conditions that you may in the garden never be able to duplicate. The engravers do a little improving so that the result, even if you never get a bloom, pays for your efforts, (I hope).

It seems to be fairly successful, judging by my customers, in my picking only those that will give results for you with a minimum of swearing and I believe that I have about every top color and form represented IF IT IS POSSIBLE TO AND STILL HAVE A GOOD PLANT, or else I will tell you what to expect with such as that most gorgeous of all pink roses, "The Doctor" or that Lulu is not a large growing plant or that Treasure Island used to be very tempermental but that from this last crop I can promise you some of the longest, most gorgeous rosebuds in existence. The plant does not like the midwest sun for more than a few morning hours even though the bloom can really take the heat, yet in the northwest it will make a good plant though not a huge one.

If you are intending to buy new rose plants to fill in those beds where some old ones died, don't do it, as I will refuse to sell them to you if I know about it,

UNLESS—

... you dig out all of the old soil for about a foot and a half square and deep and replace with soil free of rose material, as my plants or others will not give results unless you do. "Toxins" is the answer. I repeat, people do amazing and astounding things to roses and then still expect them to grow and flourish!

WOUND PROTECTION

There are those who ignore my planting instructions and refuse to paint the huge wounds on the top where there is so much evaporation that often the big wood dies and you never get results that you could have otherwise. After this follow my instructions instead of doing what some other person says.

Catalogs will not be sent to more than 3 names without personal application.

BUSINESS TERMS

Please do not send cash or stamps as cash is apt to get lost in the mails. I cannot handle stamps. Often a bank draft is cheaper than a Post Office money order. Your personal check is acceptable.

PAYMENT—ROSES PREPAID

I will not accept any order unless accompanied with at least a deposit of 50%. For those who feel they must have billing I suggest that they try some of my competitors who will be glad to oblige. 5% extra for cities or states where billing is necessitated. No order accepted for less than payment of \$3.00 at time of ordering.

NO PHONE ORDERS ACCEPTED

All orders of bush and climbing roses and tulips will be prepaid.

Rhododendrons and tree roses as well as weeping trees will be sent express charges collect—although there will be no packing or crating charges. These items are not mailable. Government Orders are not solicited because of Red Tape involved—NOR from the State of Florida for the same reason.

DISCOUNTS

POSITIVELY NO DEALER DISCOUNTS

Discounts will not be allowed on orders where there are more than 15 varieties unless they average three plants of a variety.

20% of on \$50.00 and over. No discount will be allowed on patent roses other than dozen rate allowed by patent owners. No discount will be allowed on combination orders of such as rhododendrons, tulips, my book, tree roses or special offers such as the Nigger Boy or other Poly. groups or the second grade dozens.

You may take discounts on discountable items where the total order amounts to the 20% minimum; thus if your order has even one discountable item in the \$50.00 order you deduct it. You must have \$50.00 worth of bush or climbing roses before taking discount. Tree Roses, Rhododendrons, etc., cannot be used in figuring discounts because they have to be handled entirely separate and it is the handling cost that earns discounts.

Substitutions—When I run short of rose varieties late in the season, I will substitute where I have something very similar.

Shipping Season—I will not ship until roses are in proper condition regardless of what some other grower does. Also, all orders will be shipped in sequence of order received except that I ship northern and Canadian border states first along with the high areas, then the middle states. Shipping will not start in western Oregon and Washington until around December 1st as earlier planting may start growth and then there would be winter damage. I will attempt to start shipping about November 5 this year to the coldest sections first.

ROSE PLANTING INSTRUCTIONS

CUT NO ROOTS! LEAVE ALL ROOTS ON! CUT NO ROOTS!

Plant your roses as soon as received, providing the ground is not frozen too hard to receive them. Hard frozen ground is the only reason for not planting roses. The bushes do not mind cold or wet.

When you open the bundle see that roots are kept moist. Do not expose them to drying winds or sun for a moment. Keep roots in a bucket of water during planting operations. Should the roses seem to be dried out through shipping delay soak roots and tops in water for 72 hours. They may die if planted when they are dried out.

Put no manure, trash or fertilizer in hole where bush is planted. It may cause root canker or burn the roots. Put only clean soil or subsoil on all sides of roots. This is **VERY IMPORTANT**. Do not ignore it. Never plant new rose bushes in soil from which old roses have been removed. Always change soil from a bed of annuals or similar source.

A **CONE OF SOIL** must be made under the center of each plant, where the roots spread downward in all directions, to avoid an air pocket. Do not put your bushes in a flat trench or hole and try to force the center flat against the soil without this support. In planting make the hole or trench large and deep enough to accommodate all roots when spread out and down at an angle of 30 degrees. Plant the union of rose and understock well above soil level. The **HIGHER THE UNION** the healthier and longer lived your rose will be.

TEN EXTRA MINUTES spent in planting each bush **PROPERLY** will give you enormously greater results in years to come. The big roots on my plants will work miracles if allowed to.

With your bush placed work soil among roots, gradually firming it down until the hole is nearly full. Then trample firmly over your now well covered roots until you could not possibly pull up the bush with your hands. If you are planting in mud omit the tramping, but tamp soil firmly from time to time.

Now fill the remainder of the hole with water, even though you are planting in mud, to carry earth down into air pockets that may be left and would cause roots in such pockets to decay instead of growing. Finish with a final layer of loose soil.

If you have received bushes having more than four or five canes, thin out the surplus canes, allowing no more than above number on a newly planted bush. Remove with a clean cut at base of the plant, and protect all wounds with tree paint or emulsified asphalt.

HILLING: All canes are to be completely covered with soil after the bush is planted, either in winter or spring. For winter covering in severe climates like Minnesota and Montana a foot of loose material such as peat or anything else of that nature that is handy will do, tho soil should be used if other material is not available this is to be covered when hard frozen in order to prevent early thaws. This may also be used the following summer to protect and keep cool the roots as well as protect the union of the rose and the understock which is the weakest part of the rose.

Be sure and paint the huge wounds on the ends of the canes to prevent drying out and possible dying of these canes—there has been some loss of plants by ignoring this factor as it is impossible to handle a huge plant like mine in the same manner as a small one.

DEAR FRIENDS AND CUSTOMERS

I have much too small a crop for this fall to warrant issuing a full size catalog as that would mean looking for new customers which I don't need to take care of the small crop that I have of some varieties such as Peace I have quite a few while some are very short. This is in part due to the severe winter we had and in part to the effects of the moving of my nursery. I had to move because of my hybridizing. For my rhododendrons alone take 2 acres now. I had to have a colder winter to test my crosses of roses for hardiness. At this elevation I do not need lath houses for my rhododendrons.

I lost all of the weeping tree roses, regulation height trees and little trees for this fall as the dormant buds froze last winter so cannot offer any for this fall though I will again have them for next year come autumn (1951 Fall).

I cannot offer any large plants of rhododendrons for this fall due to breakage during the heavy snow of last winter though I will have really fine plants in the smaller sizes.

Also do not overlook the tulip offerings of top varieties as usual and the usual generous count..

I cannot offer any Moutan or tree peonies as yet as I am holding them for propagation.

HYBRID TEA ROSES

ANGELS MATEU (Patent No. 174)—Coral salmon best color

stability \$1.50 each.....\$15.00 doz.

BETTY UPRICHARD—Two toned pink grows anywhere..... \$1.25 each

BRAZIER—Brilliant as its name, a very heavy bloomer.....\$1.25 each

H.P.'S HUGE FLOWEREL VARIETIES

Slightly hardier of the older type of which the new rose "Peace" is an example these come on longer stems and all open wide big plants and big flowers.

AMELIA GRAVERAUX—Very fragrant deep red quite hardy.....	\$1.50 each
APELES MESTRES—A climber, but the only huge flowered deep yellow of the large plant varieties.....	each \$1.50
CONRAD F. MEYER—Very hardy very fragrant, everblooming, silver pink, perfect form	each \$1.50
EVEREST—Its only fault is once blooming, it is the largest white rose	\$1.50 each
FRAU KARL DRUSCHKI—Snow white, everblooming from a huge plant. It's tops.....	\$1.25 each
MRS. JOHN LAING—Smaller growing than the rest but still a very good deep pink.....	each \$1.50
PAUL NEYRON—Deep rose color, very fragrant, thornless. Largest rose	\$1.50 each
PEACE—this really belongs in this class, as it is a huge plant and flower	see H.T.'s
ULRICH BRUNNER—Cherry red, very fragrant. Thornless huge cupped blooms	each \$1.50
VANGUARD—Belongs in the climber class but I put it here as it has an enormous flower of salmon pink always on year-old wood and a once bloomer, very hardy and a tremendous grower with very glossy foliage	each \$1.50

CLIMBING ROSES

AGLIA—Strong growing rambler type, nicely formed buds in near to yellow	\$1.25 each
ALLENS GOLDEN CLIMBER—Possibly the finest climbing tea for northern climates.....	\$1.50 each
AMERICAN PILLAR—Large single rose red bloom with a white eye real fine rambler.....	\$1.25 each
APELES MESTRES—Huge deep yellow blooms with very glossy foliage part hardy.....	\$1.50 each
BLOOMFIELD COURAGE—Brilliant red that holds the color until the petals drop a fine rambler with enormous masses of single blooms	\$1.50 each

BLOOMFIELD DAINTY—Everblooming, healthy, single
yellow fairly hardy\$1.50 each

CITY OF YORK—Huge masses of 2 inch white flowers on a
rambling type plant fairly hardyeach \$1.25

CLIMBING SPORTS ARE USUALLY TENDER TO FROST
AND ARE PRECEDED BY THE LETTERS CL.

CL. C.P. KILHAM—Salmon pink of perfect form.....\$1.50 each

CLIMB. CRIMSON GLORY (Patent No. 736)—Same rich
crimson as the busheach \$1.50; \$15.00 doz.

CLIMB DAILY MAIL—Possibly the hardiest of the climb.

H. T.s, rich red\$1.50 each

CLIMB. DAINTY BOSS—the climbing form of this fine single...\$1.25 each

CLIMB DUCHESS OF ATHOL—Brownish orange of
perfect for\$1.50 each

CLIMB. ETOILE DE HOLLANDE—Top red H. T. climber.....\$1.50 each

CLIMB. GOLDEN EMBLEM—marvelous flower and
uncertain plant\$1.50 each

CLIMB. LADY FORTVIOT—Brilliant orange\$1.50

CLIMB. LADY HILLINGDON—This climb Tea is a must
have for early flowers\$1.50 each

CLIMB. MAMMAN COCHET—One of the finest climbers
for the South\$1.50 each

CL. MME HENRI GUILLOT (Patent No. 788)—Salmon orange
like the bush\$1.50 each

CL. MME JULES BOUCHE—This superb white rose is even
better in the climber\$1.50 each

CLIMB MRS. AARON WARD—like the bush in soft coppery
pink real good\$1.50 each

CLIMB. MRS. G. A. VAN ROSSEM—this is possibly the finest
of multicolored climbers\$1.50 each

CLIMB MRS. SAM MCGREDY—the climb sport of the bush
with the same red foliage.....\$1.50 each

CLIMB. RUTH—This is certainly a glorious climber of shades of
orange only for cool sections especially on the north and
east side of the house\$2.00 each

CLIMB TALISMAN—I feel that the climbing form of this rose
is tops for any garden\$1.25

CLIMB. TREASUR ISLAND—same flower as the bush.....each \$1.50

CLYTEMNESTRA—This is a continual bloomer of perfect form—
tiny golden to orange buds. Slow climbereach \$1.50

DOROTHY PERKINS—Very hardy Rambler that most
everyone knows in pink\$1.00 each

DR. ECKNER—Superb everblooming finely formed buds and
blooms of pink and yellow large flowers and hardy too.....each \$1.50

DR. HUEY—Dark maroon blooms of medium size—A
tremendous grower\$1.00 each

- DR. VAN FLEET—soft pink glossy foliage and a tremendous grower as well as very hardy and perfectly healthy.....each \$1.00
- EVA—Red double 2 inch blooms shading to deep pink according to weather constantly in bloom.....each \$1.25
- EMILY GRAY—Medium sized buds and blooms of deep golden yellow very glossy foliage and a rambling habit very healthy....\$1.50 each
- EDNAH. THOMAS—Superb for the warm climates where it is a continual bloomer of very deep pink and double flowers.....each \$1.50
- EVA—Red shading to pink according to weather. Constantly in bloom in trusses of one inch blooms.....each \$1.50
- FELICITY ET PERPETUE—Very hardy and healthy old cluster flowered white rambler.....\$1.50 each
- FEU D ARTIFICE—continual bloomer of flame to salmon, fragrant medium sizeeach \$1.50
- FLASH (Patent No.)—medium sized blooms of brilliant scarlet reverse yellow.....\$1.50 each
- GLENDALE—Superbly formed buds and blooms opening cream and when full are white healthy and hardy medium size flowers very vigorous growereach \$1.50
- GLOIRE DIJON—this old favorite of yesterday is a constant bloomer of large double soft pink blooms shaded yellow.....each \$1.50
- GOLDEN DREAM—Steady bloomer of deep yellow, Hardy with good form tho it is best on the coast, elsewhere it fades quicklyeach \$1.50
- GOLDEN GLOW (Patent No. 263)—medium sized blooms with very nicely shaped buds that are intensely yellow very healthy plant that is vigorous.....each \$1.50; \$15.00 doz.
- GOLDEN KING—very hardy light yellow that is completely Blackspot resistant large flowers and completely recurrent.....each \$1.50
- GUINEE—Rich blackish red especially for the south large blooms and very fragrant likes heateach \$1.50
- HAMBURG—Continual blooming very rich red but only for cool sections. Really magnificent for the seacoast or very high areaseach \$1.50
- HARRIET—a climbing sport of Golden Opheliaeach \$1.50
- JERSEY BEAUTY—Large single cream to yellow glossy foliated Wichuriana Hybrideach \$1.50
- JULIA COUNTESS OF DARTREY—Enough name to choke a cow, but it really is a good exhibition rose for the cool sectionseach \$1.50
- KITTY KINNENMOTH—Possibly the finest pink climber taking many factors into consideration being everblooming, holds color, etc.each \$1.50
- LOVE—Fragrant, continual blooming with dark red blooms not hardy\$1.50 each
- MARION MANIFOLD—Red climb H.P. that blooms considerably thru the season with large blooms. Fairly hardy\$1.50 each

- MARECHAL NEIL—This most famous of all the old climbers of soft yellow, very fragrant very long pendant buds and large blooms\$1.50 each
- MARY HICKS—light red cluster flowered Rambler that recurs on the coast\$1.50 each
- MARY WALLACE—Well shaped pink buds opening to medium sized bloom that bloom thru the season with scattering blooms very healthy too\$1.50 each
- MAX GRAF—Ground cover variety with shining foliage and brilliant pink single blooms\$1.50 each
- MERMAID—huge single cream yellow blooms produced constantly will grow in full shade\$1.50 each
- MME. GREGOIRE STAECHLIN—perfect pink buds and blooms that have a greenhouse substance, a very strong grower.....each \$1.50
- MRS. PHILLIP RUSSELL—for the south, constant bloomer having a deep red that never fades and in cool weather buds come quite black good size too.....each \$1.50
- NANCY—see last catalog for complete description of this and Cascadia, to be used as companion roses as low pillars both have glossy foliage and constant bloom, Nancy is brilliant red never fading and single coming in huge trusses best in some shade.
- CASCADIA—about the same stature and same small blooms produced steadily but this is snow white I consider both "Pathway Pillars"each \$1.50
- NEW DAWN—Really hardy and continual blooming, very healthy medium sized soft pink blooms in trusses.....each \$1.50..
- NEVADA—continual blooming of large semidouble blooms that vary from creamy to blush white at its best on the seacoast or the mountainseach \$1.50
- PAULS LEMON PILLAR—huge creamy white blooms that are primarily for show purposeseach \$1.50
- PAULS SCARLET—I have improved this variety very much so that some may give continual bloom.....each \$1.50
- PHYLLIS BIDE—considerable re-bloom of small corsage type of perfect form soft pink and yelloweach \$1.50
- REVEIL DIJONAISE—brilliant scarlet with center zone of yellow more or less continual bloomer\$1.50 each
- RAMONA—The red Cherokee of song and story, blooms early in the seasoneach \$1.50
- R. WICHURIANA—Tiny, snowy white blooms in huge trusses a perfect ground cover that roots where it touches the ground.....each \$1.00
- SANDERS WHITE RAMBLER—perfectly healthy small double white flowers on a mildew proof plant a solid mass of color—unbelievableeach \$1.25
- SILVER MOON—Good sized single white blooms in large clusters on a wildly growing healthy planteach \$1.25
- SUNDAY BEST—Huge single red with a white center, good in all locations and everbloomingeach \$1.50

SOUV. DE. CLAUDIUS DENOYEL—Superb very fragrant double large deep crimson produced constantly—Unbeatable, not hardy at zero	each \$1.50
SONNY SOUTH—Everblooming soft pink of good form, good sized blooms slow climber	each \$1.50
YELLOW BANKSIA—Thornless tiny very double blooms of good form extremely interesting	each \$1.50
ZEPHERINE DROUHIN—Very fragrant steady bloomer medium sized blooms	each \$1.50

MASS EFFECT ROSES

ANENT HYBRID POLYANTHAS

Remember; no less than six of a kind sold, for if your garden does not have room for that many you should not plant them. Consider them more or less as you would a border of geraniums with the added factor of permanence and prestige.

BABY ALBERIC—The finest White Polyantha perfect formed buds and blooms. As this may be grown for corsage buds.....	each \$1.50
CECIL BRUNNER—The sweetheart rose small perfect buds very fragrant	each \$1.50
CINNABAR—brilliant red orange on a strong plant.....	Six for \$7.50
FLOKESTONE—Huge semidouble flowers of red with a cinnamon fragrance—not for eastern conditions due to fading, Always a prizewinner here	Six for \$7.50
EUTIN—Possibly the finest of all clustered flowered H. poly's in red.....	Six for \$7.50
COMMON CHINA—I will sell one of this as some want it for its historical value tho I believe that a bet is overlooked in not using it for mass effect due to its many fine qualities	each \$1.50
GOLDILOCKS (Patent No. 672)—The finest of the Yellow H. Poly's	Six for \$7.50
MARY GUTHRIE—Possibly the finest of all pink mass effect roses large single blooms produced constantly and never blackspots	Six for \$7.50
PERLE D ORR—pointed buds of soft orange fine in cool locations use for table and corsage work.....	each \$1.50
PINK GRUSS AN AACHEN—All the wonderful qualities of Old Gruss an Aachen in the color of pink—truly a wonderful border rose that is double	Six for \$7.50
NIGGER BOY—This remarkable rose has a low, compact, densely fol- iaged plant 18 to 20 inches high, and as much through. This perfectly healthy plant is covered continually with masses of brilliant crimson blooms. Please do not order less than six of a kind and save extra correspondence, for even though the blooms are like smaller Crimson Glories, you cannot judge from single plants. No further discount	Six for \$9.00

SPECIES, RUGOSAS AND UNUSUAL ROSES

- AGNES—very hardy, coppery yellow, Rugosa Hybrid double
medium sized bloomseach \$1.50
- AUSTRIAN COPPER—Such a brilliant rose! Copper red of great
brilliance. Reverse of the single petaled rose is yellow. Once seen,
it is never forgotten. Each\$1.50
- AUSTRIAN YELLOW—This is the original wild and amazing
brilliant single yellow rose of those high rolling plateaus from
where the white race sprang east of the Caucasus.each \$1.50
- BLACK PRINCE—H. P. One of the older red hardy roses.....each \$1.50
- BLANCHE DOUBLE DE COUBERT—Snow white Rugosa with
about two rows of petals continual blooming really
good shrub roseeach \$1.50
- CARDINAL DE RICHELIEU (Gallica)—Novel to say the least. It's
so old that it's new! Possibly a hundred petals in this rather small
rose. Its color is a very pleasing wine. A remarkable perfect
rose of the type.each \$1.50
- DAMASCEANA (Kazanlik) (Rose of Casile)—In Oregon called the
Mission Rose. This variety is so ancient that its origin is lost
in antiquity, yet it is still in commerce. It is fragrant, double,
light pink shading darkereach \$1.50
- HARRISON'S YELLOW—This is possibly a hybrid of Persian
yellow or Austrian and R. Spinnosissima, anyway, it is fairly
healthy compared to Persian yellow, tho it is paler in color.....each \$1.50
- JOHN RUSKIN—H. Rugosa bright red with some fragrance
and considerable recurrenceeach \$1.50
- MUTABILIS—small bush rose of many colors single,
constant bloomereach \$1.50
- NEVADA (a Hybrid Moyesii)—Huge semi-double blooms that come
steadily. Color milk white, sometimes flushed cream and pink.
Makes a shrub of about 4 to 5 feet in my climate. It is wonderful
at high elevations and on the seacoast.each \$1.50
- PERSIAN YELLOW—Double very deep yellow blooms. This and
Harrison's Yellow are the ones you remember in grandmother's
garden. I had some difficulty in getting these two separated, tho
there is a great deal of difference, as many nurserymen sold either
one for the other not knowing the difference.each \$1.50
- PINK GROOTENDORST—Just like little double pink carnations
produced steadily from a very thorny plant.....each \$1.50
- REINE DES VIOLETTES—A very fragrant old rose that is entirely
thornless as well as very hardy. It has the old style center divided
into 4 sections with very short petals in the center, surrounded
by a great many more in regular arrangement. In color it shades
from an orchid pink center to lavender at sides, color getting
more bluish as it ages. It is an upright growing plant that is very
vigorous. Really worth while novelty of much more than a
hundred years ago. Continual bloomer.each \$2.00

- ROGER LAMBELLIN—H.P.—Unique! Deep maroon edged white with petals waved and fringed. This old rose is a continuous bloomer.each \$1.50
- R. HUGONIS—The famed Gooden Rose of China.....each \$1.00
- R. OMIENSIS PTERCANTHA—Just as unusual as its name. THORNS! ! Enormous translucent blood red paper thin, interspersed with tiny leathery foliage. The new growth is the attraction of this rose, tho the small snow white flowers are among the first in the spring Each.....\$2.00
- RUBRIFOLIA—This reddish plum colored foliaged rose is very hardy as well as healthy. Has pale pink blooms and red fruits.....\$1.50
- R. SPINNOSISSIMA ALTIACA—For those who want a lower growing shrub, it is perfectly healthy and has enormous milk white blooms early in the season followed by black fruits. I believe that this rose has the largest white blooms of any species rose. Extremely hardy. Each.....\$1.50
- R. VIRGINIANA—Really a honey of a species rose. Has deep pink single roses sparkling among its clean heavy foliage, and in my climate, all summer long! Each\$1.50
- RUGOSA MAGNIFICA (Rugosa)—Large flowered deep rich purple with a strong cinnamon perfume, not very double. This is one of the extremely satisfactory shrubs, as it does not get diseases, also it is extremely hardy and is a constant bloomer. I consider it a considerable improvement on "Hansa". Grows about 4 ft. tall and spreads wide if not pruned back. Has beautiful glossy rugose foliage. Each.....\$1.50
- SCHOENERS MUSK—This Hybrid is magnificent, making enormous trusses of milk white blooms that are about 1½ inches across. A tremendous grower and bloomer. A pillar of this rose is a grand sight. each..\$1.50
- SCHOENERS NUTKANA—Has about the largest pink single blooms of all the shrub roses. They are as large as those of the H. T. Frances Ashton, or about 3 inches across. These are produced in a very long blooming season in greatest profusion, simply covering the plant. They are of a very deep and rich color followed by a huge crop of orange seed pods. This will make a plant up to 8 ft. tall and wide if not sheared to shape. Very hardy. Each \$1.50
- R. SEMPERVIRENS—This is an enigma. This is the same rose as pictured in Ellen Wilmot's book. The source I obtained it from was authentic, yet when I analyze it I know someone slipped, as a species is a single, "always" yet this has as nice corsage buds of blush pink shaded yellow at the base as one could ask for. It is of the rambler type and foliage is very persistent, Climber. Each.....\$1.50
- VON. SCHARNHORST—This marvelous Hybrid is really a masterpiece of a shrub rose and is a cross of an H.P. and a foetida which accounts for its creamy color and perfect continuity, along with its shrub like vigor as well as definite hardiness. I know of no rose excelling this for an ever-blooming shrub for mass effect. Each.....\$1.50

RHODODENDRONS

RHODODENDRONS—I will have customers to refer to last seasons catalog or write for one as I do not have any but small sizes for this fall up to about 18 inch.

EMPRESS TREE

EMPRESS TREES—I have a few of these but they are only for the Pacific Northwest or where the temperature does not go down to zero very much as that kills the flowering buds. The flowers are like gigantic lavender snapdragons and are produced before the foliage and are fragrant, the tree is possibly the best garden tree in that you can grow other plants right up to the trunk as this tree feeds deep. It is an extremely fast grower with soft roots which necessitate spring planting. It has huge leaves like a catalpa. It is not usually stocked in nurseries due to its growing so fast that it is not salable the following season coupled with its microscopic seeds which require greenhouse germination. Shipped express collect. Size from 2½ to 3½ ft. where it will branch on starting growth Each.....\$3.00

TULIPS

I believe that I have picked the top varieties in this collection. Do not order less than six bulbs of a kind. These are of my own growing except those marked otherwise.

I cannot afford to pack and ship less than a \$3.00 order of Tulips even though they are included with a rose order as the tulips have to be sent early and separate. You will find that my tulip selections are equal to my rose selections of varieties and that you will get uniform good results with my bulbs, but mind you must not let them get above 70 degrees or else they will grow short stunted.

For southern gardens you should put your bulbs in your refrigerator for 40 days and keep them just above freezing. But mind you they should be wrapped in many layers of wax paper and wet peat or other wet material to prevent excessive drying.

Also for the second year they must not stay in the hot soil or they will not bloom. They must be dug as soon as the foliage turns brown. All orders for tulips must be in by September 25th as I will have started planting by that time. I will promise you that you will get the same results with my tulips as with other things you have bought from me.

Tulips deteriorate very rapidly when the temperatures get above 70 F. and even tho they may bloom they do not have the fine bloom that properly handled bulbs have. For that reason be sure that you buy from a grower who stored his bulbs in an insulated warehouse as even a few days at 70 will harm them.

Never put any fertilizer in trench where you plant the bulbs—it may burn them or if down deep may make gases that may poison them and give you far less results. Put it on top of the ground and let the rain take it down. Also, if cats or dogs walk over the tops of the tulips you will have far less blooms and considerable disease due to packing the ground.

If you must buy the gigantic new parrots, I have them—but do not recommend them as the irregularities of the buds hold water that does not dry off quickly, then Botrytis will either spoil the flower or prevent blooming entirely—so unless you have a very windy place, do not try Parrot tulips. Then wind may break them.

100 of one variety at \$1.00 less than eight times the dozen price.

- ADVANCE**—This is really an advance as it blooms about the time of the little dwarf early ones and in addition to this gets to be about 22 inches tall with flowers as large as the most gigantic Darwin. In color it is called scarlet orange by the Dutch but with me has always been a deep salmon\$1.15 doz.
- AMERICAN FLAG**—For those who want the spectacular, this large and tall tulip with its red and white stripes and Darwin shape make it a must.\$1.35 doz.
- BLUE EAGLE**—Gigantic deep violet cups on very long stems. Early. This variety does not make large bulbs even tho the bloom is large.....\$1.25 doz.
- CITY OF HAARLEM**—Very strong, tall and has a waxy sheen over its rich deep scarlet. It is of very large size, and in addition to this is the longest lasting of all the tulips I know. It is also an early bloomer. I found that from most sources it was badly mixed with other inferior red tulips that did not have the lasting ability of this tulip, so it took me years to get a stock of true City of Haarlem.....\$1.25 doz.
- DEMETER**—About the earliest of all the giant tulips, a rich purple with a snow white base that really makes it stand out in a bouquet.....\$1.25 doz.
- DIDO**—As I have a large amount of Dido, I will really give you a bargain considering the mammoth bulbs I will send you of this variety. This is, in my estimation, the finest of all salmon flame tulips in addition to being tall and early. Pointed petals and very fragrant, this is the richest of all tulips at this time. Here is one of the finest tulips at a real super-duper special price. No less than a dozen sold at this price.....\$1.00 doz.
- FOSTERIANA LEFEBER**—This is also called Red Emperor but as there is also another called Scarlet Emperor I feel safer to use its real name. There is nothing like this tulip as it blooms with the Daffodils. Does not make large bulbs. Is about the most brilliant scarlet of anything that grows, and coming so early in the season it is really sensational as it is even earlier than the dwarf early tulips. The flowers are lily shaped and up to nine inches across and on stems about ten or twelve inches tall..\$1.25 doz.
- FLAMING BEAUTY**—A very beautiful, new to most people. Tulip of brilliant yellow with red stripes.....\$1.25 doz.
- GLACIER**—This white tulip grows to tremendous size and does not have the fault of many as it has light colored stamens. This to me is very important as I do not like to look into a tulip and see it looking dirty from dark or black pollen. In addition to these good habits it is very tall and early, too.....\$1.50 doz.
- G. W. LEAK**—A brilliant scarlet tulip with a clean light yellow base that does not have dirty looking black stamens to spoil the effect of its contrasting colors. Has elegantly pointed petals, late bloomer.....\$1.25 doz.
- LOUIS XIV**—Of the breeders with their metallic shades I like this as well as any. It has tremendous size and of lasting quality, too. Base color is purple with a heavy shading of bronze graduating to a golden bronze at petal edges\$1.25 doz.
- MARSHALL HAIG**—I believe that this is the finest brilliant scarlet. It is also very large and tall has a yellow base which also emphasizes \$1.25 doz.
- MRS. MOON**—This is beyond doubt the most popular of all yellow tulips because of its elegant pointed lilly form and is very fragrant, too. In addition to all this it is very tall and graceful.....\$1.25 doz.

- PRESIDENT HOOVER**—One of the finest of the Oranges, flushed copper red with perfect egg-shaped blooms that stay closed.....\$1.25 doz.
- SUNDEW**—This red tulip has a fringe all round the petals which makes it very unusual and interesting. It is also late.....\$1.25 doz.
- THERESE**—I believe that this is the best of the huge new parrots in the red shades. I haven't listed any in the past as I knew that in the rainy weather you will lose many blooms from Botritis because of the roughness of the buds that will not allow the rain drops to run off, especially in places where there is not much wind to dry them off quickly, in fact even in my wonderful new location about half never make good blooms, though for the high mountain areas or where moisture being held on the buds or blooms is not a factor.....\$2.00 doz.
- TUBERGENS GLORY**—I have been looking for a satisfactory deep to medium pink tulip for years and one that was large with a strong stem and that would hold its color better than the rest—I think this variety is it\$1.25 doz.
- QUEEN OF THE NIGHT**—Large black red (called black) tulip, this unusual plant seems to be most popular of all the so-called "Blacks".
\$1.25 doz.
- MIXTURE OF GOOD VARIETIES**.....\$1.00 doz.

HENNESSEY ON ROSES

Most of the directions for rose care have been omitted from this catalog because they have been treated so much more fully, and with all the underlying reasons for every course of procedure taken care of so thoroughly, in my new rose book, "Hennessey On Roses." Rose growers will profit from omission of necessarily sketchy outlines of rose care in this catalog, and a study of the full subject together with the "why's" behind it.

The book of about 65,000 words, illustrated with numerous photographs taken in my own gardens, will be available at the price of \$3.50. Send orders directly to Roy Hennessey, Scappoose, Oregon. The book is entirely new and contains innumerable scientific facts behind rose behavior that have never been discovered before. It is a book of applied science made enjoyably readable. The book not only discusses all the facts pertaining to aknowledg of the rose which have enabled me to produce my remarkable plants (which are no accident!), but answers every question that has ever been asked me on the rcse. Every bit of the book is designed to be applied to your own rose garden.

You won't find anything in the book approached from the conventional standards, and only a couple of "theories." The rest of the material consists of rose facts, the knowledge of which enables me to produce Hennessey roses. A knowledge of them will enable you to care for your roses with outstanding results, and you will greatly improve your enjoyment of your rose garden because you will be in possession of all my knowledge of what makes roses do as they do.

The book is not padded or dated with discussion of existing Hybrid Tea rose varieties which would make it obsolete in a few years. Description of best modern rose varieties is the function of this rose catalog.

FIVE DOLLAR SPECIAL—Now All Postpaid

This is my second grade of plants. Some are not named for various reasons such as mixtures in the field or quantities too small to catalog and too small to go into my top grade listings or for the reason that the roots may be cut short. In a word, most of these will in time equal my top grade but usually not the first season. This offer is good only for Washington and Oregon coastal areas—not for the mountain areas or the rest of the U.S. If you order them ignoring this selling instruction, your money will be refunded without explanation. You will have my usual generous count of a dozen plants. These must be taken as put up or not at all as they are put up in about fifty bundles at a time. Do not ask for description of any variety you find in them that you do not know—if you do not want to buy them this way, O.K. There are no Polyanthas in these, but usually there will be one climber. I suggest that you ask others about the value of these special dozens, and I promise you will be more than pleased if you have ever bought rose plants before from any dealer. Indeed most of these will do as well as the top grade from other sources. These bundles will have a complete color range, although there will be some coastal varieties mixed with them.

MINIATURE ROSES

CENTIFOLIA MINIMA—a very tiny flowered Centifolia in soft pink with the opened bloom only a half inch across a counterpart of the large old variety with all of that wonderful fragrance as well as multitude of tiny petals each \$1.50
